in output annually

34,000
jobs

Meta also supports a major population of small businesses that help form the core of Alabama's economy.

98% of the businesses that use Facebook in Alabama are small and medium-sized businesses (SMBs).²

Among these SMBs in Alabama that use Facebook:

54%
are women-led.

9%
are rural.

47%
are minority-led.

47% report that they make at least 25% of their sales digitally in a given month.

30% report that they have offered formal training for employees in the form of internships or apprenticeships.

48% report that they have increased their sales through the use of digital tools.

67% report that they have communicated directly with customers through digital tools.

¹ Based on experimental research, Meta's 2022 US advertising revenue of \$48.9 billion led to \$162 billion in advertiser revenue across all states. Total output and employment for supply chains linked to these advertiser revenues (along with Meta's non-advertising revenue) are estimated using input-output tables published by the Bureau of Economic Analysis (BEA). More on our calculation methodology can be found at research.facebook.com/economiccontribution.

² SMBs are defined as having 250 or fewer employees. Metrics are based on responses to an uncompensated, opt-in survey in English of 43,219 people nationally on the Facebook app between January 6-21, 2023. All estimates are based on responses from self-identified business owners and managers within the state based on self-reported state location.
